SUMMARY

Full-Stack Developer with hands-on experience building and deploying production-grade web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in REST API design, authentication systems, and real-time features, with a strong foundation in Data Structures & Algorithms, OOP, and database management. Experienced in debugging, troubleshooting, and optimizing full-stack systems, with proven ability to communicate technical solutions clearly across development and support contexts.

EDUCATION

Roland Institute Of Technology

November 2022 - May 2026

Bachelor Of Technology, Computer Science And Engineering

CGPA - 8.19

SKILLS AND PROFICIENCIES

Programming Languages: Java, JavaScript

Frontend Technologies: HTML5, CSS3, Tailwind CSS, React.js

Backend Technologies: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL, SQL

Tools & Platforms: Git, GitHub, Postman

Computer Science Fundamentals: Data Structures & Algorithms (DSA), Operating Systems (OS), Computer Networks (CN), Database Management Systems (DBMS), Object-Oriented Programming (OOP)

WORK EXPERIENCE

Jspider

Feb 2026 – Present

SDE Trainee

Bengaluru

- Developed responsive web applications using HTML, CSS, Bootstrap, JavaScript, and React.js, following modern frontend development practices..
- Developed autonomous AI agents for email automation, workflow orchestration, patient triage, and business process automation.
- Applied full-stack development concepts through hands-on assignments, coding exercises, projects, and regular code execution tests, strengthening debugging and problem-solving skills.

PROJECTS

VibeChat — Real-Time Chat Application | MongoDB , Express.js, React.js, Node.js, JWT, REST APIs

- Developed a real-time chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js) with a modern and responsive user interface.
- Implemented JWT-based authentication to provide secure user registration, login, and protected application access.
- Integrated real-time communication features including typing indicators and online presence status for an interactive messaging experience.
- Optimized MongoDB schemas and database operations for high-frequency message writes and efficient retrieval of chat history.
- Designed and integrated RESTful APIs for user management, messaging, and chat operations, ensuring reliable communication between the React frontend and Node.js backend.

Web Service Quality Classification | Python, CatBoost, Scikit-learn, Flask, HTML, CSS, Machine Learning, Semi-Supervised Learning

- Developed a machine learning application to classify web services based on Quality of Service (QoS) parameters.
- Implemented a semi-supervised learning approach using CatBoost for web-service classification.
- Built an interactive HTML/CSS frontend for users to provide QoS parameters and obtain predictions.
- Integrated the ML model with Flask to enable real-time prediction and classification through a web interface.

CERTIFICATION

- Cisco Networking Academy — Python Essentials:** Covered Python fundamentals, variables, data types, control flow, functions, data structures, exception handling, and basic programming concepts.
- LetsUpgrade — MySQL Bootcamp:** Covered SQL fundamentals, database design, CRUD operations, joins, subqueries, aggregate functions, constraints, and data manipulation/querying.
